Kedungpring, Kemranjen, Banyumas (53194) || Ratu Jaya, Cipayung, Depok (16439)

Software Engineer focused on Frontend Development with robust Full-Stack experience building complex web applications using React, Next.js, TypeScript, Python, and Laravel. Proven track record of engineering scalable B2B systems from scratch, developing responsive interfaces, and integrating REST APIs. Experienced in translating diverse business requirements from corporate room booking systems to traditional market dynamic PoS into practical, secure digital solutions.

TECHNICAL SKILLS

- **Languages :** JavaScript, TypeScript, PHP, Python, HTML, CSS, SQL
- **Frontend :** React.js, Next.js, Vite, Tailwind CSS, REST API Integration
- **Backend & Database :** Laravel, NestJS, MySQL, PostgreSQL
- **Tools & Concepts :** GitHub, Vercel, Postman, JWT Authentication, Role-Based Access Control (RBAC)

WORK EXPERIENCE

Techworksnesia | **Remote** Sep 2026 - Present

Co Founder & Full-Stack Engineer

- Co-founded a software agency to architect and develop custom B2B applications, including dynamic PoS systems for traditional markets and inventory software for automotive workshops.
- Engineered an end-to-end operational management system for a Vocational Training Center (LPK) using React (dual Staff and Student Portals), FastAPI (Python), and PostgreSQL.
- Developed a robust backend architecture with ~161 REST API endpoints, implementing strict Role-Based Access Control (RBAC), JWT authentication, and comprehensive audit trails.
- Designed a resilient database schema utilizing PostgreSQL JSONB collections with partial unique indexes to ensure payment idempotency and resolve concurrency race conditions.
- Built a secure custom local document storage system featuring atomic writes and anti-traversal mechanisms.
- Integrated WhatsApp Cloud API with queuing and retry mechanisms for automated, idempotent billing notifications and candidate follow-ups.

DiikatJanji | **Purwokerto, Indonesia** Dec 2024 - Sep 2026

Freelance Front End Engineer

- Developed an interactive digital invitation platform using Next.js and Tailwind CSS, successfully delivering over 10 custom templates for active clients.
- Integrated frontend components with a Laravel and MySQL REST API to seamlessly process and manage client data.
- Optimized cross-device responsiveness and UI elements, contributing to a 70% increase in user engagement on the main landing page.
- Secured business development funding through the Program Mahasiswa Wirausaha (PMW) 2025 to scale the platform's operations and services.

PT. Telkom Indonesia | **Jakarta Pusat, Indonesia** Aug 2025 - Feb 2026

Software Engineer Intern

- Built and independently deployed a centralized room booking system using Next.js, TypeScript, and MySQL to resolve meeting schedule overlaps.
- Implemented Authentication and Role-Based Access Control (RBAC), ensuring secure access for 5 division administrators.
- Successfully eliminated 100% of room booking conflicts across 4 different divisions through real-time schedule tracking.
- Developed a document tracking feature to streamline operational workflows and data sharing among external partners.

Smartani | **Purwokerto, Indonesia** Jun 2025 - Feb 2026

Freelance Front End Engineer

- Built the company's main landing page for an IoT business initiative using React.js, Vite, and Tailwind CSS.
- Managed application state effectively using React Hooks (useState) and collaborated directly with UI/UX designers to translate Figma mockups into interactive components.
- Structured the frontend codebase to ensure fast response times and smooth rendering across various mobile and desktop devices.

PT. Kereta Api Indonesia DAOP V | **Purwokerto** Jul 2024 - Aug 2024

Information System Intern

- Developed a scalable Internship Management System using PHP, Laravel, Filament, and MySQL to digitize administrative processes.
- Built the system to comfortably handle thousands of records, initially deploying and testing the application for 76 active interns.
- Implemented RBAC for secure data handling before handing over the fully functional application to the internal IT division.

PROJECTS

Expert System for BMW E36 Diagnostics ("Si Pak-E") | **Undergraduate Thesis**

Tech Stack: Next.js, NestJS, TypeScript, PostgreSQL, Tailwind CSS

- Developed a full-stack expert system web application to diagnose engine and suspension issues in BMW E36 vehicles.
- Engineered the backend using NestJS and PostgreSQL, implementing the Certainty Factor algorithm to calculate diagnosis accuracy based on expert rules and user inputs.
- Built the user interface with Next.js and implemented layered JWT Authentication and RBAC to secure admin, expert, and regular user dashboards.

EDUCATION

Universitas Jenderal Soedirman | **Purwokerto Indonesia** Aug 2022 - May 2026

Bachelor of Computer Science,

- GPA: 3.79 / 4.00
- Leadership Experience: Chairman of the Organizing Committee for "Informatics Championship"; Head of Futsal Division (Engineering Faculty).
