## SUMMARY

Full-Stack Engineer and Computer Science graduate (GPA 3.79/4.00) building web applications across React/Next.js frontends and FastAPI, Laravel, and NestJS backends. Built a 161-endpoint operational management system with RBAC, JWT authentication, audit trails, and idempotent payment processing. Completed software engineering and information systems internships at Telkom Indonesia and KAI, delivering internal tools that replaced manual workflows.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS
**Backend:** FastAPI, Laravel, NestJS, REST API Design, JWT Authentication, RBAC
**Frontend:** React.js, Next.js, Vite, Tailwind CSS, Filament
**Databases:** PostgreSQL, MySQL, Database Design
**Deployment & Tools:** Git, GitHub, VPS, Hostinger, Vercel, Postman, Figma
**Integrations:** WhatsApp Cloud API

## WORK EXPERIENCE

**Techworksnesia** | Remote | techworksnesia.com
*Co-Founder & Full-Stack Engineer* | *Sep 2026 – Present*

- Built a production-ready operational management system for a vocational training center (LPK) using React, FastAPI, and PostgreSQL, with separate staff and student portals, scoped for 121 students, 6 instructors, 2 admins, and 1 owner.
- Developed a 161-endpoint REST API with FastAPI and PostgreSQL, implementing RBAC, JWT authentication, and audit trails.
- Designed a PostgreSQL schema using JSONB fields and partial unique indexes to keep payment processing idempotent and prevent duplicate operations under concurrent requests.
- Built a local document storage module with atomic file writes and path traversal protection.
- Integrated the WhatsApp Cloud API with queued retries for automated billing reminders and candidate follow-ups.
- Co-founded a B2B software agency whose workshop inventory and point-of-sale system is in use by one client; lead business development and sourced every client currently in negotiation.

**PT Telkom Indonesia** | Jakarta Pusat | On-site
*Software Engineer Intern* | *Aug 2025 – Feb 2026*

- Built and independently deployed a meeting room booking system (Next.js, TypeScript, MySQL) for a 112-employee project unit with 7 rooms, created to address frequent scheduling conflicts.
- Implemented role-based access control: booking rights for 5 secretaries (4 divisions and the project head’s office) and an administrator, with read-only schedule access for all 112 employees.
- Implemented time-overlap validation that automatically rejects any booking colliding with an existing reservation for the same room, preventing double bookings across up to 5 meetings per day.
- Developed a document tracking feature to support operational workflows and data sharing with external partners.

**Smartani** | Purwokerto | Part-time, Hybrid
*Frontend Engineer (Freelance)* | *Jun 2025 – Feb 2026*

- Built the live landing page for an IoT business using React, Vite, and Tailwind CSS as the sole frontend engineer, working with a backend engineer and a UI/UX designer.
- Translated Figma designs into interactive UI components and managed application state with React Hooks.
- Structured the codebase for responsive rendering across mobile and desktop devices.

**DiikatJanji** | Purwokerto | Part-time, Hybrid
*Frontend Engineer (Freelance)* | *Dec 2024 – Sep 2026*

- Developed a digital invitation platform with Next.js and Tailwind CSS, used by 6+ clients.
- Delivered 10+ custom invitation templates, both independently and in collaboration with the team.

- Integrated frontend components with a Laravel and MySQL REST API to manage client data.
- Optimized responsive UI components across mobile and desktop devices.
- One of 7 team members awarded Program Mahasiswa Wirausaha (PMW) 2025 business development funding.

**PT Kereta Api Indonesia (Persero) DAOP V** | Purwokerto | On-site
*Information System Intern* | *Jul 2024 – Aug 2024*

- Developed an internship management system (PHP, Laravel, Filament, MySQL) that replaced paper-based records, giving staff visibility of intern start dates, end dates, and active headcount.
- Deployed and validated the system with 76 active intern records.
- Implemented role-based access control and handed the application over to the internal IT division.

## PROJECTS

**Si Pak-E: Expert System for BMW E36 Diagnostics** | Undergraduate Thesis
*Tech Stack: Next.js, NestJS, TypeScript, PostgreSQL, Tailwind CSS*

- Built a full-stack expert system using the Certainty Factor method with two modules: engine power loss (33 symptoms, 22 faults, 88 rules) and undercarriage (37 symptoms, 46 faults, 60 rules).
- Achieved 80–90% diagnostic accuracy when tested against assessments at a BMW workshop.
- Implemented JWT authentication and RBAC for administrator, expert, and user dashboards.

**NginapYuk: Accommodation Booking Platform** | Academic Team Project
*Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Laravel, PHP, MySQL*

- Extended an existing booking platform with new features across the Next.js frontend and Laravel backend.
- Integrated Laravel REST APIs with MySQL to support end-to-end booking workflows.

## EDUCATION

**Universitas Jenderal Soedirman** | Purwokerto, Indonesia
*Bachelor of Computer Science* | *Aug 2022 – May 2026*

- GPA: 3.79 / 4.00
- Leadership: Chairman, Organizing Committee of “Informatics Championship”; Head of Futsal Division, Engineering Faculty

## ADDITIONAL

**English:** English Proficiency Test (EPT), Universitas Jenderal Soedirman: 355/450
