Central Java | Jakarta Area, Indonesia

Software Engineer focused on Frontend Development with hands-on experience building web applications using React, Next.js, TypeScript, Laravel, and Python. Experienced in developing responsive interfaces, integrating REST APIs, implementing authentication and role-based access control, and building business applications for real-world operational workflows.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Python, SQL, HTML, CSS
- **Frontend:** React.js, Next.js, Vite, Tailwind CSS
- **Backend:** Laravel, NestJS, FastAPI, REST APIs
- **Databases:** MySQL, PostgreSQL
- **Engineering:** JWT Authentication, RBAC, API Integration, Database Design
- **Tools:** Git, GitHub, Vercel, Postman

WORK EXPERIENCE

Techworksnesia | Remote

Co Founder & Full-Stack Engineer | Sep 2026 - Present

- Co-founded a software agency focused on developing custom B2B applications, including point-of-sale systems for traditional markets and inventory management software for automotive workshops.
- Engineered an end-to-end operational management system for a Vocational Training Center (LPK) using React, FastAPI, and PostgreSQL, with separate Staff and Student portals.
- Developed a REST API backend with approximately 161 endpoints using FastAPI and PostgreSQL, implementing RBAC, JWT authentication, and audit trails.
- Designed a PostgreSQL schema using JSONB fields and partial unique indexes to support idempotent payment processing and prevent concurrency-related duplicate operations.
- Built a custom local document storage system with atomic file writes and path traversal protection.
- Integrated the WhatsApp Cloud API with queued retries for automated billing notifications and candidate follow-ups.

DiikatJanji | Purwokerto, Indonesia

Freelance Front End Engineer | Dec 2024 - Sep 2026

- Developed an interactive digital invitation platform using Next.js and Tailwind CSS, delivering more than 10 custom templates for active clients.
- Integrated frontend components with a Laravel and MySQL REST API to process and manage client data.
- Optimized responsive UI components across mobile and desktop devices to improve the landing-page user experience.
- Secured business development funding through the Program Mahasiswa Wirausaha (PMW) 2025 to support the platform's operations and services.

PT. Telkom Indonesia | Jakarta Pusat, Indonesia

Software Engineer Intern | Aug 2025 - Feb 2026

- Built and independently deployed a centralized room booking system using Next.js, TypeScript, and MySQL to address meeting schedule overlaps.
- Implemented authentication and role-based access control for 5 division administrators.
- Implemented real-time schedule tracking for room bookings across 4 divisions, eliminating recorded booking conflicts.
- Developed a document tracking feature to support operational workflows and data sharing with external partners.

Smartani | **Purwokerto, Indonesia**

Freelance Front End Engineer | Jun 2025 - Feb 2026

- Built the main landing page for an IoT business initiative using React, Vite, and Tailwind CSS.
- Implemented application state management using React Hooks and translated Figma designs into interactive UI components in collaboration with UI/UX designers.
- Structured the frontend codebase to support responsive rendering across mobile and desktop devices.

PT. Kereta Api Indonesia DAOP V | **Purwokerto**

Information System Intern | Jul 2024 - Aug 2024

- Developed an internship management system using PHP, Laravel, Filament, and MySQL to digitize administrative processes.
- Designed the application to support large internship datasets and validated the system with 76 active intern records during deployment and testing.
- Implemented role-based access control for secure data handling before handing over the application to the internal IT division.

PROJECTS

Expert System for BMW E36 Diagnostics ("Si Pak-E") | **Undergraduate Thesis**

Tech Stack: Next.js, NestJS, TypeScript, PostgreSQL, Tailwind CSS

- Developed a full-stack expert system web application for diagnosing engine and suspension issues in BMW E36 vehicles.
- Engineered the backend using NestJS and PostgreSQL and implemented the Certainty Factor algorithm based on expert rules and user inputs.
- Built the user interface with Next.js and implemented JWT authentication and RBAC for administrator, expert, and regular-user dashboards.

NginapYuk - Full-Stack Web Application | **Academic Team Project**

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Laravel, PHP, MySQL, REST API

- Customized and extended a full-stack accommodation booking platform based on an existing project foundation, adapting features and application workflows to meet academic project requirements.
- Developed and integrated frontend features using Next.js, React, TypeScript, and Tailwind CSS, while implementing backend functionality using Laravel and PHP.
- Integrated the frontend with Laravel REST APIs and MySQL to manage application data and support end-to-end application workflows.
- Contributed across both frontend and backend development, including UI implementation, API integration, business logic, and data management.

EDUCATION

Universitas Jenderal Soedirman | **Purwokerto Indonesia**

Bachelor of Computer Science | Aug 2022 - May 2026

- GPA: 3.79 / 4.00
- Leadership Experience: Chairman of the Organizing Committee for "Informatics Championship"; Head of Futsal Division (Engineering Faculty).
